

# co-design process

## implement and learn

Are we 'biodegrading' as conveners?  
What messages are we getting, and  
how do we learn from them?

## build the conditions

Are we the right people for this work? is it needed?  
What's in it for others?  
Who are we working with? What matters to them?  
Who can take part?

## test and refine

What appears promising in the context?

## immerse and align

Should we be doing this?  
What do we already know?  
Who should we partner with?  
Where are the gaps?

## design

How do we build on what is already strong?

## discover

What is happening in the context?  
What is already strong?  
What are people longing for?
